## Intumescent Strips to FD30 & FD60

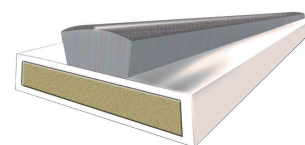

### Intumescent Strip - Fire Only

These self adhesive strips are fitted around doors (rebated either into the frame or the door) to give passive fire protection. The material they are manufactured from expands with heat to seal the gap between the door and the frame, thereby stalling the spread of fire. The Fire Only strips do not retard the spread of smoke.

### Intumescent Strip - Fire & Smoke

The Fire & Smoke products include a brush strip along the full length of the strip. The brush slows down the spread of smoke until the heat of the fire causes the intumescent strip to expand and seal the gap.

### Fire Compliance

Both the Fire Only and Fire & Smoke strips are approved by Certifire and passed at BS476 Part 22 & 31.1.

They are available in one length (2.1 metres) and three widths:

- 10mm & 15mm - these are fire rated to 30 minutes and can therefore be used where FD30 compliance is required
- 20mm - these are fire rated to 60 minutes and can therefore be used where FD60 compliance is required

The strips are available in two colours; white and brown, and are provided sealed complete with fitting instructions.

Code	Type	Fire Rating	Colour	Pack Quantity	Size
HAISFO210010B	Fire Only	30 mins	Brown	50	2100mm x 10mm
HAISFO210010W	Fire Only	30 mins	White	50	2100mm x 10mm
HAISFO210015B	Fire Only	30 mins	Brown	25	2100mm x 15mm
HAISFO210015W	Fire Only	30 mins	White	25	2100mm x 15mm
HAISFO210020B	Fire Only	60 mins	Brown	25	2100mm x 20mm
HAISFO210020W	Fire Only	60 mins	White	25	2100mm x 20mm
HAISFS210010B	Fire & Smoke	30 mins	Brown	50	2100mm x 10mm
HAISFS210010W	Fire & Smoke	30 mins	White	50	2100mm x 10mm
HAISFS210015B	Fire & Smoke	30 mins	Brown	25	2100mm x 15mm
HAISFS210015W	Fire & Smoke	30 mins	White	25	2100mm x 15mm
HAISFS210020B	Fire & Smoke	60 mins	Brown	25	2100mm x 20mm
HAISFS210020W	Fire & Smoke	60 mins	White	25	2100mm x 20mm

Other intumescent strips available to order.
